

## Article 85: The Importance of County Sheriffs

by Anna von Reitz

Like everything else, the office of the county sheriff has been under assault by the rats. All "counties" like all "states" are now operating as commercial corporations. This is indicated by the use of the word "of" in all states that have adopted the Uniform Commercial Code---- thus you have the "State of Utah" and the "County of Maricopa". Anytime you see the word "of" you know you are dealing with a commercial corporation no different in nature than Sears or Burger King, Inc. These are all "states of states" under the UCC and though they claim to "represent" your government and provide governmental services, you have to always be aware and keep in mind that these corporations are NOT your lawful government. They are just corporations fulfilling "government functions" under contract.

In the same way you and your county sheriff have to be aware that his actual elected office is owed to the land jurisdiction of the Continental United States and to the people who live in his county on the land, NOT to some corporation making a buck providing "public services" and operating in the international jurisdiction of the sea--- which is foreign to us.

The actual Constitution and the rights it guarantees are owed to the land jurisdiction of the Continental United States. The Constitution is not being respected by the Federal United States and its "agencies" operating in the international jurisdiction of the sea because these agencies are subcontractors---- privately owned corporations in the business of providing public services, not your true government providing public services.

The upshot of it is that the men employed as "County Sheriffs" are receiving their paychecks funded off your estates and tax dollars from middlemen who are employees of privately owned corporations acting as subcontractors providing "government services". Those middlemen, including the politicians, don't think that they actually work for you. They think that they work for the corporation doing business as the "State of Ohio" or the "County of Jackson".

This creates a gross conflict of interest. Time to straighten this all out.

The place where the pedal hits the metal is the office of the county sheriff.

There are 3100 counties in America. Below are listed the 242 sheriffs who know their actual jobs as sheriffs operating the land jurisdiction of the Continental United States and who honoring the Law of the Land, the actual Constitution.

All the rest of the county sheriffs in America and that is:  $3100 - 242 = 2858$ , have to be educated. They don't even know who they work for and what their job is and where their authority lies.

It would cost me about \$5000 to provide each one of these 242 men with a free copy of our affidavit of probable cause --- "You Know Something Is Wrong When....An American Affidavit of Probable Cause" --- which explains the history and documents the facts of how we got into this mess.

It's information these men desperately need, but I am just one old woman and I don't have the money to print 242 copies of the affidavit for free and the postage and the packaging and the time needed to get book to them and those 2858 other sheriffs who are bumbling around not knowing what their job is or what their obligations to the people are.

Thankfully, there are 390 million other Americans with just as much or more at risk than me---- and there are very few of them who can't afford \$20 to enlighten their own county sheriff. Give these brave men the "ammo" they need to stand up and competently defend their authority and their jurisdiction on the land, and God willing, they will act to defend you and your rights.

As for the rest of them, the 2, 858 "county sheriffs" who think they work for the corporation and not for the people, who are functioning as corporate "law enforcement officers" --- that is, commercial mercenaries--- instead of peacekeepers acting to enforce the actual Public Law---- they need the information even more desperately and the people living in all those 2,858 counties have a clear, urgent need to make sure their "sheriffs" do understand who they work for and what their job actually is.

Stop a moment--- if you read this list and see your County Sheriff is taking a stand to uphold the actual Constitution in your behalf, support him! Get behind him! Help him any way you can! Give him a copy of "You Know Something Is Wrong When....An American Affidavit of Probable Cause" so that he has the specific information he needs to defend what he is doing against the corporate bosses who are misdirecting and misinforming your employees.

If you don't see your county sheriff listed here, the need to get him up to speed and doing his constitutionally mandated job and exercising the jurisdiction of your county on the land is even MORE urgent.
